

Proven in the Most Demanding Fire Departments Across the Nation

Superior Customer Value

- *Multi-Purpose Apparatus*
- *Small Foot Print And High Water Flow Volume*
- *Stainless Steel Cab & Body Construction*

Waterway Flow with Excellent Operation Flexibility

- Industry leading 1,500 GPM waterway flow exceeding other fire apparatus manufacturers by 500 GPM
- Protected internal waterway in upper boom
- 60' Vertical Reach and 35' Horizontal Reach with a 360-degree rotation
- 325' water stream reach allowing for a 155,000 sq. ft. coverage from a single vehicle set-up position on either side
- Articulating water tower allows you to do more with less equipment and personnel

Fire Scene Command Center

- Optional elevated light tower features FRC Spectra LED lights - 56,000 Lumens allows you to put the light exactly where you want it
- Real-Time suppression feedback through optional infrared onboard thermal imaging camera
- Fireground observation through optional water tower-mounted camera for “Eye in the Sky” scene assessment

Built For Stability

- Stainless Steel Cab and Body construction
- GVWR Axle ratings as low as 49,800 LBS
- The overall structure of the stabilization device is configured to handle the large volume of water
- Offered with the 141” Marauder[®] and 142” Capitol[®] Stainless Steel Chassis

Quick & Easy Maneuverable Set-Up

- Auto-deployable single set A-frame outriggers with 11' 6” total spread which allows for ease of set up on tight streets, alleys, and cul-de-sacs
- Innovative design eliminates the need for jack pads
- Handheld remote-control functions up to 900' from the apparatus for water tower and nozzle operations
- Mounted on a single axle chassis with a short wheelbase, making it highly maneuverable to limited access areas and tight locations

Protecting What Matters Most
