

Proven in the Most Demanding Fire Departments Across the Nation

The Industries' Premier Split-Tilt Cab

- *Available with Pumpers, Pumper-Tankers, Aerials, & Rescue Apparatus*
- *Available in 2, 4, 6, 8, 10 Person Seating Capacity*

Safety Cage Cab Design

Seagrave cabs are built with more structural integrity than any other cab on the market. The Attacker® features Seagrave's exclusive safety cage cab design with a stainless steel substructure that surrounds firefighters to keep them safe to and from the scene.

Designed for Safety & Functionality

- Interior space is designed for optimized head and leg room
- Minimum of 59" floor-to-ceiling height
- Ultra quiet cab design engineered using the latest NVH technology achieving under 85dB inside
- High density anti-slip floor covering

Ease of Operation and Maintenance

- Split tilt cab for low-clearance maintenance while in station
- Dedicated airflow sweeps the windshield for fog-free visibility
- Independent HVAC control for front and crew areas of the cab
- Easy access to DEF and batteries without tilting the cab
- Recessed seat belt retractors
- Adjustable upper seatbelt anchors
- Front portion of the cab tilts 45 degrees for engine access while the back portion remains fixed
- Lowest overall height of cab tilt: 105"

Various Cab Lengths

- Attacker® Cab - 68#
- Rear Attacker Cab® - 142#
- Rear Attacker Cab® - 148#
- Rear Attacker Cab® - 154#
- Rear Attacker Cab® - 184#

Stainless Steel Split Tilt Cab

- No plastic or fiberglass used in the construction of the cab sub-frame, floor assembly, front assembly, side assemblies, back wall assembly, or roof assembly
- Allows quick and safe access to the engine and system components
- Tethered control allows operator to stand a safe distance away from the cab during tilting operation
- Higher position of the air intake reduces risk when crossing standing water in emergency situations
- Heavy duty stainless steel door construction with hemmed and welded skins

Protecting What Matters Most

Seagrave Stainless Steel Marauder®

142" Attacker® / Split Cab

This remarkable cab begins with a Seagrave exclusive – a substantial three inch rectangular-tube steel subframe. Welded over this subframe is a completely enclosed, all-stainless steel superstructure that creates a protective cage. The entire structure is then covered with heavy gauge, stainless steel. The finished Attacker® is one of three premiere cab choices, designed to outperform in longevity, durability, and safety.

The Split

The attacker features an open interior design with split at the front axle centerline. The front portion of the cab tilts forward 45 degrees for engine access with the rear crew section remaining fixed. The cab incorporates an automatic inflatable seal between the forward and rear cab sections to keep moisture and debris out of the cab area.

Cab Safety Cage Specifications:

Roof Assembly: 1.25" Stainless Steel Tubing

Front A Pillar: 2"x3" Stainless Steel Tubing

Back Wall: 1.25" Stainless Steel Tubing

Sides: 1.25" Stainless Steel Tubing

By purchasing a Seagrave, you are showing the utmost regard for the safety of your department's personnel. Seagrave cabs are constructed of the highest quality materials and produced with exceptional craftsmanship. Seagrave cabs are built with the customers in mind. Seagrave cabs feature a robust safety cage designed to protect firefighters in the occurrence of a collision.
